

IT Security Analyst

Location: Selangor, Malaysia

Company presentation:

A world leader in gases, technologies and services for Industry and Health, Air Liquide is present in 72 countries with approximately 67,800 employees and serves more than 4 million customers and patients. Oxygen, nitrogen and hydrogen are essential small molecules for life, matter and energy. They embody Air Liquide's scientific territory and have been at the core of the company's activities since its creation in 1902.

Entity and activity description:

The APAC Global Services (AGS)'s ambition is to deliver sustainable performance through operational excellence, while identifying and implementing disruptive and innovative digital solutions that offer the business a competitive advantage tomorrow. This Organization is striving for excellence, adopting the best in class models to deliver value through simplification and standardization of processes, while adhering to internal controls and compliance requirements.

How will you CONTRIBUTE and GROW?

As an IT Security Analyst, you will play a key role in ensuring the confidentiality, integrity and availability of information assets. You will work closely with the security team to identify, assess and mitigate potential security risks and accidents.

Responsibilities:

- Assist in monitoring and analyzing security events and alerts from various security monitoring tools, identify potential security incidents and take appropriate action.
- Help in managing and maintaining security tools and technologies, such as firewalls, intrusion detection/prevention systems and security information.
- Assist in the development and implementation of security policies, procedures and standards to ensure compliance with regulatory requirements and industry best practices.
- Participate in incident response activities, including investigating security incidents, coordinating with internal teams and external stakeholders.
- Collaborate with cross-functional teams to provide security guidance and recommendations on technology initiatives, projects and deployments.

Who Are We Looking For?

The successful candidate should have:

- Bachelor's degree in Computer Science, Information Technology, Cybersecurity, or a related field.
- Strong interest in information security and familiarity with fundamental concepts, principles, and best practices.
- Basic understanding of networking concepts, operating systems, and databases.
- Excellent analytical, problem-solving, and critical-thinking skills.
- Strong communication skills, both written and verbal, to effectively communicate technical concepts to both technical and non-technical stakeholders.
- Thrives on working in a team environment
- Goal oriented and views strategic procurement as a key business capability and professional direction
- Knowledge in using Oracle / EPIC Coupa will be advantage
